Justification for decision: (Use continuation sheet if necessary and attach map)
Based on the limited photographic information, the dwelling located on parcel 88 in Bloomington appears to be an early twentieth century building with several alterations. The two story main block of the building is rectangular in configuration with one story appendages on the north and south elevations. The frame dwelling has been covered in synthetic siding, expanded by two additions and displays altered windows and modern chimneys. When a historic sites survey was conducted in Bloomington in 1981, the building was identified as non-contributing and located outside the survey district (G-I-E-195). In my opinion, the building lacks architectural integrity and does not embody distinctive characteristics of type, period, or method of construction to be eligible for the National Register.

Documentation on the property/district is presented in: Bloomington Apartments compliance file, MD Inventory Bloomington Survey District (G-I-E-195)
